

 **ERGONOMIC** SEATING

ErgoSelect™ SEATING RANGE

Ergonomic seating at its best!

The ErgoSelect™ range, a superior range of ergonomic office chairs. Extensive testing, research and trials have led to the development of the ErgoSelect™ range, designed with the health and well being of the user in mind.

One of the unique features of ErgoSelect™ is the availability of ergonomic choices and customised options which allow the user to style a chair to their personal seating requirements and enjoy an enhanced seating experience.

ErgoSelect™ chairs are fully upgradeable, with a selection of interchangeable component options.

10YEAR
GUARANTEE

“ ErgoSelect™ chairs are guaranteed to 140kg

The ErgoSelect™ chair range will cater to a wide range of users. ”

ErgoSelect™ CHAIRS... FOR MULTIPLE APPLICATIONS

AFRDI LEVEL 6

The ErgoSelect™ Spark high back, 3 lever, no arms has AFRDI level 6 accreditation for severe commercial use. The majority of components in all ErgoSelect™ chairs are however AFRDI level 6 certified and conform to AS/NZS4438-1997 ensuring you are purchasing a quality product designed to last.

“

ErgoSelect™ chairs have been carefully designed with the user in mind.

You can easily adjust the chair to suit your working style! ”

ERGONOMIC OPINIONS VARY,
AND SO DO THE CHAIRS IN THE ErgoSelect™ RANGE.

SIT RECLINED

This provides great back support, and it's a good idea to use a footrest when sitting reclined.

SIT UP STRAIGHT

This is in all the Ergonomic books - knees, hips, elbows all at 90 degrees or just over. You will need to use all the chair adjustments to set this up correctly.

SIT FORWARD

A very natural and comfortable position. For those of us that have found ourselves sitting on the front edge of our seats, with our knees low, just so we can stretch our back.

Dynamic ergonomics

Ergonomics is concerned with the "FIT" between the user, their equipment and their environment

With modern ergonomics encouraging people to be more active during the day, it is even more important to choose a chair that will suit your working style. The optional ErgoSelect™ 4 lever mechanism is perfect for the Dynamic office. Whilst continuing to offer the many features of the ErgoSelect™ 3 lever mechanism, the additional tilt tension control allows the chair to move with you. You can also lock or unlock the unique forward tilt feature.

We understand that there are many different requirements for ergonomic chairs, not only do ergonomic opinions vary, the people, the tasks and the workplace all contribute to the complexity of finding the correct support for each individual.

WHY ARE ErgoSelect™ CHAIRS A TOP SELLER?

“

The ErgoSelect™ chairs exceptionally comfortable seat and supportive back are immediately appreciated. The heavy duty mechanism, back height and lumbar adjustment promotes an ergonomically correct seating position with ease.

”

ErgoSelect™

"Quality you can rely on"

The heavy duty mechanism with 3mm plate steel construction, and 10 year guarantee make the ErgoSelect range a perfect choice if you are looking for a chair that will last. The 10 year guarantee also includes the fabric when our standard Laine Smart fabric is used.

A feature of the Spark chair is the integrated lumbar pump. Coupled with the sliding seat and adjustable height back, the lumbar pump allows you to alter the curvature of the lumbar support for even better back shape control.

ErgoSelect™ is a system that allows you to “Build your own chair”

So which options do you choose? – some options like gaslift height, seat size and back height can be determined by your size, or your working situation.

Other options like mechanisms and backs are more personal and relate more to how you prefer to work.

Backrests:

Spark or Swift?

Spark backs are all fully upholstered and fitted standard with a lumbar pump. This allows you to change the shape of the backrest to give you support where you need it.

Swift backs are mesh, so they breath better and offer a different type of support that moulds to your back

Mechanisms:

3 lever or 4 lever mechanism?

3 lever mechanisms are the most common, and allow the chair to be set up with the seat tilt or back angle locked at any angle you choose.

4 lever mechanisms are more of a ‘rocking chair”, the mechanism can be unlocked and the tilt tension adjusted to your body weight. The 4 lever mechanism also has a separate lever to allow or lock out the forward tilt feature.

Lever controlled gas lift raises or lowers the seat to comfortably suit your leg length

GUARANTEE FINE PRINT: ErgoSelect™ range

The guarantee covers faulty workmanship and materials for 10 years from the date of manufacture; the guarantee does not cover fair wear and tear, or the chair upholstery.

The guarantee is a “back to base” guarantee. You need to return the chair to the place of purchase, and any faulty parts will be replaced free of charge.

Should you require your chair repaired on site you will be subject to a service charge, you can call your place of purchase for an estimate of the cost to complete repairs on site.

NB: This guarantee does not cover freight costs, or on site labour costs. Labour costs are covered if the chair is returned to the place of purchase.
